Implant Announcement

Dear Patients,

Dental Implants are a great way to replace missing teeth or securing a loose fitting bridge. Our office is proud to announce that after many years of restoring dental implants, we have started placing the implants in our office. Not only does this allow our patients to remain in our office for the entire treatment of the implants, it also provides a more cost effective option for our patients. In order to increase knowledge and experience, continuing education courses in dental implantology were taken at the Medical College of Georgia.

Many insurance companies are now providing benefits for dental implants. Please call for a complimentary implant evaluation to see if they are the right treatment option for you.

For those of you whom are reluctant to receive dental care, we will soon offer IV sedation dentistry.

Sincerely,

The Mazzawi Family
